

As part of your child's enrollment, Social Development requires a copy of your child's immunization record. If you have chosen not to immunize your child or a copy of this record is not available , the Department of Social Development will allow parents to sign a waiver. This waiver states that parents must keep their child out of daycare when a communicable disease is in its contagious stage and proof of immunization has not been provided.

I understand that I must keep my child out of daycare when a communicable disease is in its contagious stage and proof of immunization has not been provided.
